

LEONIA PUBLIC LIBRARY

Duct Tape Bookmarks

- 1) Make two squares of equal size from card stock.
- 2) Draw a diagonal line on first square. Cut along the line. This will leave you with a square and two triangles.
- 3) Cover the square completely with Duct Tape. Do not cover the triangles.
- 4) Place tape on one triangle. Fold the over excess tape on bottom edge only. This should leave tape exposed on the remaining two edges. Do not fold the tape over the rest of the triangle. This will be folded over the diamond instead to create a pocket, and the uncovered portion of the triangle will be on the inside.
- 5) Place the triangle on your square, folding excess tape over the edges of the square. This will create the pocket for your bookmark!
